

Do you carry IP55 enclosures?

We carry IP55 enclosures that demonstrate almost complete protection from particles and a good level of protection against water. All of our enclosures rigidly adhere to the guidelines, so you can count on outstanding and cost-effective enclosures. Refer to the chart below for the IP55 standard protection specifications and ratings:

What is an IP55 rating?

The correct IP classification directly affects the stable operation of installed equipment. One of the most widely used protection levels is IP55. In this article, we explain what an IP55 rating is, how protection against dust and water is achieved, and which design features allow an IP55 enclosure to withstand outdoor and industrial environments.

What is a rated IP55 enclosure?

Let's take a closer look at each rating. An enclosure rated IP55 offers limited protection from dust--enough to prevent it from interfering with equipment--but it's not completely dust-tight. It can also handle low-pressure water jets from any direction, like rain or a light hose spray.

What is an IP55 rating in outdoor cabinets?

The IP rating on enclosures is an international protection standard that indicates how well the cabinet is protected against two factors: the ingress of dust or solid particles, and the ingress of water.
